TIMELINE

Step 2: Setup & Compliance

As a Level 4 company, PalletBiz set up the necessary infrastructure and processes while ensuring compliance with industry standards. Workforce allocation, equipment installation, and operational protocols were optimized for efficiency.

Step 4: Expansion & Network Support

Leveraging our global network across Europe, the Middle East, and Africa, we enhanced efficiency, improved workforce training, and optimized costs. Best practices from our other operations were implemented to maximize performance. Onsite new pallet assembly was introduced as an added cost savings to the client

Step 1: Opportunity

PalletBiz secured the opportunity to establish a pallet repair operation at the big Construction Industry Facility. During this phase, we aligned the project with client's scope of work and tender requirements, ensuring a clear roadmap for execution.

Step 3: Implementation & Execution

The pallet repair operation was officially launched and integrated into client's supply chain. We focused on maintaining service quality, streamlining operations, and conducting regular performance assessments to refine processes.

Step 5: Sustainability & Growth

A final review was conducted to ensure alignment with client's vision of "creating concrete possibilities." We assessed operational success, cost-effectiveness, and long-term sustainability, further solidifying PalletBiz's role as a premium partner in packaging and handling.

The aim was to ensure

- Cost-saving operations
- Securing stock availability
- Consistent best quality pallets
- Safe working environment
- Delivering best KPI's for the client

Pallet Inspection and Repairs at the Client's Facility

New Pallets Supply to production plant

ON-SITE OPERATIONS METHODOLOGY

Overview

- 1 Manual Inspection & Sorting:** Each pallet is inspected by hand and categorized into three groups—Good, Bad, and Ugly—based on its condition.
- 2 Repair & Restoration:** Damaged pallets are repaired at designated worktables using the correct tools and techniques, ensuring structural integrity and longevity.
- 3 Quality Assurance:** Every repaired pallet undergoes a quality check to meet PalletBiz's high standards before being reintroduced into circulation.
- 4 Consistent Supply to Production:** Repaired and quality-approved pallets are supplied back into the production process, ensuring uninterrupted operations.

ON-SITE OPERATIONS METHODOLOGY

Inspection process

1

Pallet Returns

Pallets return from trade and are received for assessment.

2

Inspection

Pallets are inspected to determine usability, repair needs, or scrap status.

3

Sorting

Sorted pallets move to the next stage of the process.

Our process ensures efficient handling and categorization of returned pallets for optimal reuse.

ON-SITE OPERATIONS METHODOLOGY

Repairing process

Experienced Staff

PalletBiz employs experienced staff for efficient and quality repairs.

Electric Saws

Electric saws are used for dismantling, reducing loss of recoverable material.

Optimized Process

Our team optimizes the repair process, saving costs and improving quality.

PalletBiz invests in skilled labor and equipment, ensuring quality while reducing material waste.

ON-SITE OPERATIONS METHODOLOGY

Painting / Stenciling

Quality Tools

PalletBiz utilizes quality air spray equipment for painting and stenciling pallets.

This ensures a professional finish and clear branding on repaired pallets.

Consistent quality and clear identification ensures brand recognition in the field.

CONCLUSIONS: Benefits of Partnership with US

PalletBiz enhances the pallet pool quality, reducing CAPEX for new pallets while ensuring consistent production volumes.

Our modernized handling process minimizes pallet friction and damage, while efficient repairs preserve quality timber, saving costs.

We prioritize compliance with Health, Safety, and Environmental standards, maintaining a clean facility.

As a premier partner, we are committed to excellence in packaging, handling, and pallet supply.
