INFOSHEET METAL

ABOUT PALLETBIZ METAL

Metal Handling Equipments are being used in all industry corners to provide a stable and often long-termed solution for transport and warehousing needs.

In PalletBiz we are often met with inquiries for Metal Handling Equipments, that is either standard or very specialized or even where wood and metal is combined to form the optimal solution to cater for our clients needs.

In this brochure, you will find a selection of the most common types of Metal Handling products we offer. We hope you will find what you are searching for and if not – do not hesitate to contact one of our representatives to provide you with your preferred or our recommended solution.

**“IN PALLETBIZ WE HAVE A GREAT
COMBINED EXPERIENCE WORKING
WITH BOTH WOOD AND METAL
– OFTEN A GREAT COMBINATION
CONSIDERING COST”**

UIC GITTERBOXES

The most common transportation and warehousing steel box.
Certified by EPAL & UIC according to DIN 15/155 C Norm 435-3. Each box has a unique Y-Pylon number.

Technical Specifications:

Dimensions inside:

1200 x 800 x 800 mm

Wire-mesh:

3,8 - 4,2 mm

Load capacity:

1500 kg / 0,75 m³

Stacking:

4x stackable

Surface:

RAL 7030 grey

Loading quantity per truck:

96 / 108 pcs. (MEGA / Trailer)

- **Standardized product - Exchangeable globally**
- **Superimposed load capacity of up to 6.000 kg. when stacking**

FOLDED WIRE MESH CONTAINER

Dimensions based on UIC Gitterboxes with opportunity to folding, made of wire mesh.
Loading properties same like in UIC boxes.

Technical Specifications:

Dimensions inside:

1200 x 800 x 800 mm

Load capacity:

900 kg and 1500 kg

Stacking:

3x stackable

Surface:

All RAL colors or zinc surfaced

Loading quantity per truck:

To 200 pcs.

- **Another cost alternative to UIC Gitterboxe**
- **Collapsible and easy handling**

HALF BOXES

Designed and produced according to your specification. Half boxes are designed for smaller and lighter loadings with or without clap. Produced with wire mesh or walls from steel, with load capacity to 1500 kg.

Technical Specifications:

Dimensions:

according to your request

Load capacity:

900 kg and 1500 kg

Stacking:

3x stackable

Surface:

All RAL colors or zinc surfaced

Loading quantity per truck:

192 / 216 pcs. (MEGA / Trailer)

- Great storing & handling solution for components and spare parts
- Flexible and popular solution for industrial warehouse stacking

STEEL COLLARS

Alternative to the UIC Boxes and mountable on all 1200 x 800 sized pallets. Same functionality as Steel boxes and takes less storage space. Possibility to divide with one or two claps, and can be designed according to your specifications, with a height up to 2000 mm.

Technical Specifications:

Dimensions:

1200 x 800 x 800 mm

Wire-mesh:

50 x 50/100 x 3,8-4,2 mm

Load capacity:

1000 - 1500 kg

Stacking:

3x stackable

Surface:

All RAL colors or zinc surfaced

Loading quantity per truck:

Approx. 700 pcs.

- Flexible and collapsible, ensuring easy handling & storing
- Fantastic cost-conscious solution

MOBILRACK/MANURACK PALLETS

With mobilrack pallets you can store your pallets with the goods and this way create a flexible and safe racking system. Mobilrack pallets are produced according to the TÜV standard. 2 types available - Single and Double.

Technical Specifications:

Dimensions inside:

1005 x 1370 mm (single)

1005 x 1870 mm (double)

Load capacity:

1500 kg / Max height 870 mm

Stacking:

Up to 5x stackable

Surface:

All RAL colors or zinc surfaced

Loading quantity per truck:

300/400 pcs. (MEGA / Trailer)

- Compatible with Euro pallet dimensions
- Great solution for optimizing warehouse storage space

“GITTERBOXES ARE ONE OF
THE MOST WELL-KNOWN
AND RECOGNIZED
HANDLING PRODUCTS
IN THE PROFESSIONAL
INDUSTRY“

HOW TO CHOOSE THE RIGHT PACKAGING

Using Metal Handling Equipments equipment can be a long-termed investment in your storage facility, for your intercompany logistics or perhaps to transport cargo to your clients in a safe & responsible way. Like all products, metal will sooner or later deteriorate and become of poor if not to times – dangerous condition.

When deciding on the next investment, make sure to reach out to your local representative and let us find the right solution for your company: quality and price considered.

Perhaps we can offer a buyback solution on your old packaging items and offer you an alternative to what you have been used to in the past.

No matter what – PalletBiz Metal is your solid partner!

PALLETBIZ PRODUCES STANDARD AND CUSTOM MADE METAL HANDLING EQUIPMENTS FOR THE AUTOMOTIVE, ENERGY & OTHER INDUSTRY SEGMENTS

SOLID CONTAINERS WITH OR WITHOUT CLAP

Designed and produced according to your specification, either with or without claps. Solid Containers are universal and durable with wire mesh or solid walls from steel and load capacity up to 6000 kg.

Technical Specifications:

Dimensions:
400 mm to 1900 mm
Load capacity:
900 to 6000 kg
Surface:
All RAL colors or zinc surfaced
Loading quantity per truck
25 to 255 boxes

- ✓ **- Good flexibility in size and construction**
- ✓ **- Can resist heavy loadings while keeping your products safe and solid**

STEEL PALLETS

Steel pallets have many advantages compared to other pallets made from different materials. These include the highest load capacity of a pallet, high durability, withstanding harsh storage environments, and ease of cleaning and maintenance, where a sanitary & hygienic work environment is required.

Technical Specifications:

Dimensions inside:
1200x800x130-150 mm
Load capacity:
1500 kg
Surface:
Steel - blue, grey, green
Additional Info:
Skids from steel - 2mm

- ✓ **- Sturdy build to support heavy loads in trasport**
- ✓ **- Optimum durability compared to wooden and plastic pallets**

** Not all PalletBiz entities hold all certifications.
